Demystifying the Software Defined WAN Webinar – Coming December 15th

With the cost of MPLS circuits and bandwidth high compared to broadband, and broadband getting easier than ever to acquire, organizations increasingly want to leverage broadband while maintaining their SLAs for mission critical applications delivered over the WAN. Enter the SD-WAN!

In this webinar, we'll cover:

- State of the Network and its Prospect

To see how high expectations for performance have risen, look no further than the digital news industry and how 8 seconds is simply too long.

10 Reasons to Deploy an SD-WAN Infographic

Business critical applications

Maximize network capacity and performance while minimizing costs when you consider transitioning from an all MPLS WAN to a hybrid WAN or even using 100% Internet for WAN connectivity. Let Talari do the math for you. Check out this WAN Connectivity Savings Calculator.
