Talari Unite Partner Ecosystem Delivers Technology-Rich, Validated WAN and Branch Solutions

New ecosystem reduces the interoperability uncertainty, complexity and costs that enterprises and service providers face when deploying an SD-WAN

SAN JOSE, Calif., - May 26, 2016 — [Talari Networks](#), the trusted software-defined WAN leader that proactively manages WAN capacity, reliability and performance in real-time to keep critical business and mission critical applications and services running, today announces the launch of the Talari Unite™ Technology Alliance program. Encompassing an ecosystem of robust technology providers, the Talari Unite program extends the value of SD-WAN and allows enterprises to engineer reliable and resilient networks for business-critical applications and services.

The Talari Unite program offers partners the opportunity to bring new capabilities to existing customers that are looking for cost-effective methods to keeping their critical networks performing without interruption. The program framework enables partners to extend Talari's purpose built SD-WAN solution, the most robust solution for sub-second detection and response to network and application impairments; and to deliver superior quality of user experience.

Together, Talari Networks and its partners are providing end-to-end solutions that enable enterprises to solve their IT challenges while meeting their financial targets. Talari Unite members will focus in areas such as security, business applications, cloud, virtualization, WAN optimization, wireless networking and storage. Partners will have access to a number of resources to speed up solution development, including free virtual appliance and software licenses, on-line lab and solution lab resources, and substantial discount on physical appliances.

"As the technology and market leader, Talari has been changing the way enterprises and their service providers engineer and manage their WANs since our first customer deployment in 2008," said Michele Hayes, VP of Marketing at Talari Networks. "The Talari Unite program enhances our ability to offer integrated solutions that facilitate revenue opportunities for our partners and deliver thoroughly tested and validated solutions to our mutual customers."

Components of Talari's leading SD-WAN solution include a **network control node**, providing centralized intelligence for SD-WAN, **purpose built appliances** for data center, branch, virtual or cloud deployments, a **secure overlay** network that supports MPLS, Internet, wireless and satellite networks, the **award-winning Aware for SD-WAN** management and analytics for comprehensive visibility, and leverages integration and support for Amazon Web Services, Microsoft Azure, and VMware.

About Talari Networks

Talari Networks, the trusted SD-WAN technology and market leader, engineers the internet

and branch for maximum business impact by designing fail-safe WANs that deliver superior business-critical application reliability and resiliency, while unlocking the simplification and cost reduction benefits of branch consolidation.

Talari's comprehensive solution supports a variety of network services in physical, virtual and cloud locations, which can be acquired through perpetual licensing, monthly subscription rates or as-a-service. Talari's solution has innovated to its fifth generation of product, deriving knowledge over the last eight years from billions of packets served across thousands of customer deployments in 40 countries.
