Talari Networks Named Finalist for its WAN Virtualization in the 2011 Best Products Awards by *Network Products Guide*

Winners Honored in Las Vegas on May 10, 2011

San Jose, Calif. – May 9, 2011 – Talari Networks, Inc., the company bringing WAN Virtualization and cloud economics to Enterprise networking, today announced that *Network Products Guide*, an industry-leading technology research and advisory guide, has named its Mercury T3000 Adaptive Private Networking (APN) appliance a finalist for the Sixth Annual 2011 Best Products Award in the Networking Solutions category. Winners will be announced in Las Vegas tomorrow during the awards dinner hosted by *Network Products Guide.*

Talari Networks is being recognized for its Mercury T3000 APN appliance, which provides business-class WAN reliability (99.99 percent or greater) and predictable performance by using affordable public WAN links versus expensive private WAN links such as MPLS. The Mercury T3000 is designed for headquarters and data centers with large networks. It works in concert with Mercury T730 and T750 appliances at branch offices or colocation facilities, and T200 at SOHO or remote offices of larger organizations typically served by IPsec VPNs. Using Talari's WAN Virtualization, enterprises:

- Gain 30 to 100 times the bandwidth per dollar;
- Can reduce monthly WAN service costs by 40 percent to 90 percent; and
- Have greater reliability and application performance predictability than existing private WANs that use single-provider Frame Relay or MPLS services.

###

About Network Products Guide Awards As industry's leading technology research and advisory publication, Network Products Guide plays a vital role in keeping decision makers and end-users informed of the choices they can make in all areas of information technology. You will discover a wealth of information and tools in this guide including the best products and services, roadmaps, industry directions, technology advancements and independent product evaluations that facilitate in making the most pertinent technology decisions impacting business and personal goals. The guide follows conscientious research methodologies developed and enhanced by industry experts. To learn more, visit networksproductguide.

About Talari Networks
With WAN Virtualization, Talari Networks does for Enterprise WANs what RAID did for storage --
delivering a network with 30 to 100 times the bits per dollar, ongoing WAN costs reduced by 40% to 90%,
and greater reliability than existing corporate WANs -- bringing Moore's Law and Internet economics to
Enterprise WAN buyers for the first time in more than 15 years. In 2011, Talari was named a Gartner Cool
Vendor. For more information, please visit www.talari.com.
