

Law Office Wins Cases by Improving Network Reliability and Performance with a Talari Software Defined WAN

Lawyers at Taft, Stettinius & Hollister, LLP can work effectively and efficiently without gaps in communications due to network outages

SAN JOSE, Calif., — Oct., 13, 2015 — [Talari](#), the technology innovator and market share leader of Software Defined WAN (SD-WAN) solutions that help businesses perform brilliantly with the creation of a smart network that proactively manages capacity, quality and performance, announced today that Taft, Stettinius & Hollister, LLP has deployed a Talari Software Defined THINKING WAN (SD-WAN) across its eight offices to ensure that lawyers can operate at the highest levels without being impacted by network reliability and performance issues.

Taft is a premier regional law firm with more than 400 lawyers in eight offices in Arizona, Illinois, Indiana, Kentucky and Ohio. Service provider network outages were preventing Taft lawyers from working when and how they wanted.

“In our business, everything is an emergency so a reliable network is fundamental. We bought Talari to make the network more reliable, and it did exactly what it promised,” says John Carroll, Director of Technology Solutions at Taft. “Even when we have carrier outages, our network stays up and running without a hiccup.”

In addition to improving network reliability at Taft, Talari’s SD-WAN solution has increased network capacity and lowered operational costs, while ensuring that phone calls, videoconferences and business-critical applications are not impacted by service providers’ underlying network issues. Talari also has given Taft the freedom to perform network maintenance and even change network service providers during normal business hours without interrupting the workflow of its employees.

“A Talari THINKING WAN enables businesses to significantly improve the reliability and

performance of their networks and simplify remote or branch office connectivity while lowering costs,” says Kevin Gavin, Chief Marketing Officer at Talari. “Businesses are increasingly looking to SD-WAN solutions for network optimization and Talari’s comprehensive solution is the proven leader in this space with deployments in more than 35 countries.”

About Talari

Talari, the leading provider of Software Defined WAN (SD-WAN) solutions, is changing the way companies think about, create and manage their WAN by giving the network brainwidth. Only Talari's THINKING WAN proactively manages capacity, reliability and performance, packet by packet—to keep critical applications running, reduce costs and liberate IT to innovate new ways for the company to be brilliant.
